Methodology

This is a curated list of 36 lines (35 unique account names, with Town of Westerly RI supplied twice and kept as separate rows having price-lock verbiage. Unlike prior batches, this review also confirms the specific Passport product line(s) each price-lock (Mobile Payment for Parking), DPP (Digital Permits for Parking Platform), CMP (Citation Management Platform), and/or Payme payments/merchant processing).

Researched via the Ironclad Contracts connector using conversational search. For any initial "not found" result, a second, broa /"Town of" prefixes, searching by the bare place name) was tried before concluding not-found - this recovered several accounts initially missed (e.g., City of Ogden City UT, City of Oxford OH, City of Statesville NC, City of Racine WI, City of Baraboo WI, C District, and CityParking).

Two accounts (City of Rye NY, SP Plus - City of Decatur) overlap with prior reviews; this pass re-queried them specifically to ca the earlier reviews did not record.

Color key

Green = a contract was located and its price-lock/product-line details were reasonably confirmed.

Amber = a contract was located, but part of the answer (price lock, term, or termination) could not be confirmed because the ba text wasn't returned by search - only an amendment, order form, or partial metadata was available.

Red/salmon = no contract could be located in Ironclad under this account name at all, even after a broader retry search.

Confirmed price lock = Yes (15 of 35 unique accounts)

Accounts with no contract found (6)

Town of Andover, Pierce County Parks and Recreation, Benton Harbor, MI, City of Providence, RI, Corporate Security & Invest Forest Heights MD.

These may exist under a different legal/counterparty name in Ironclad. Since Cecily identified this list specifically as clients with double-checking the exact entity name for each of these before concluding no price lock exists - e.g., "CityParking" was ultima

IC-5080 (First Amendment)		
IC-6088 (amendment)	This is the same City of Kingston, NY client reviewed earlier via a directly-supplied Order Form (dated 6/25/2026): that document showed a price lock of 3% at the 1st anniversary and 4% at the 2nd anniversary and thereafter, for hardware/fees under the Order Form, co-terminous with this 2/23/2026 base Agreement. Combining both sources: price lock = Yes, 3%/4% annual increase; product line likely spans the full Agreement (MPP/CMP/DPP/Payments) since the Order Form fees run under the base SLSA, though the exact scope was not restated by Ironclad in either document reviewed	Note - appears the price lock was on a one time hardware purchase agreement
